Hi, I'm Ryan. I turn ideas into <code>.

Present:

Staff Software Engineer at Classy

<u>Since June 2022</u>

My team maintains the core of our platform, which is responsible for 90% of the company's revenue.

Past:

<u>February 2021 - June 2022</u> **Software Engineer** at StockX

α. Architected and delivered seller bonuses that rewarded seller behavior by lowering fees based on performance.

β. Led a project to allow account managers to override seller levels, bonuses, and fees. This reduced my team's manual work by approximately 75.8064516129%.

γ. Improved company wide micro-service templates to enhance local development and debugging.

<u>January 2021 - February 2021</u> **Software Engineering Consultant** at lululemon

<u>November 2018 - January 2021</u> **Senior Full Stack Developer** at Funko

α. Architected and implemented a CMS caching layer that significantly reduced load times.

β. Helped implement a new eCommerce site using headless Shopify.

γ. Built backend services from scratch and APIs for a new mobile app that saw over one million downloads.

δ. Ran large data migrations (SQL to NoSQL) on millions of records of live data.

<u>November 2017 - November 2018</u> **Full Stack Engineer** at Sur la table

α. Incorporated a cutting edge component library into a legacy CMS, using: **React, node, and npm/yarn**.

<u>March 2016 - November 2017</u> **Senior Web Developer** at TERRA Staffing Group

α. Built entire interactions from API to front end.

<u>October 2013 - March 2016</u> **Web Developer** at Roadside Dental Marketing

Skills:
